

EXECUTIVE PRESENTATION

Tata Data Analysis

Turning Data Into Strategic Decisions

Presented by: DHRUV SHRIMALI

Role: Data Analyst

Audience: CEO & CMO

PROJECT OVERVIEW

Objective

Analyze 2011 sales performance

Identify revenue trends and seasonality

Finding top performing countries and customers

Understand demand distribution for expansion

→ The goal was to transform raw sales data into actionable insights for both revenue growth and market expansion

Scope of Analysis

Tool Used: Microsoft Power BI

Data Source: Online Retail Data Set

Time Period: Dec-2010 to Dec-2011

Records Analyzed: 541910 rows of data

DATA PREPARATION — Why Our Insights Can Be Trusted

Clean data = reliable decisions. Here's how we ensured data quality before any analysis.

01

Removed Duplicates

Identified and eliminated duplicate records to prevent skewed counts and inflated metrics.

02

Handled Missing Values

Replaced or excluded null values using appropriate strategies to preserve dataset integrity.

03

Standardized Formats

Unified date formats, consistent category names, and corrected data types for accurate analysis.

✓ **Result: A clean, structured, and validated dataset — ready for reliable, board-level insights.**

BUSINESS QUESTION 01

Monthly revenue trend 2011

Power BI Visual

Key Insight

Revenue fluctuates in early months
Significant growth from September onwards
Peak observed in November & December
Clear seasonal trend (Q4 surge)

Business Implication

Sales heavily driven by seasonal demand

Recommended Action

Increase inventory & marketing before Q4
Plan campaigns around peak season

BUSINESS QUESTION 02

Top Revenue Generating Countries

Key Insight

Netherlands, EIRE, Germany lead in revenue
High quantity $\neq$ always highest revenue
Strong international demand outside UK

Business Implication

Certain countries generate high-value sales

Recommended Action

Focus marketing spend on top-performing countries
Optimize pricing & logistics for these regions

BUSINESS QUESTION 03

Top Customers by Revenue

Power BI Visual

Key Insight

Few customers contribute majority of revenue
Revenue distribution is highly skewed
Clear top-tier vs low-tier customer gap

Business Implication

Business depends on high-value customers

Recommended Action

Build loyalty programs for top customers
Personalized offers to retain them

BUSINESS QUESTION 04

Global Demand Analysis

Power BI Visual

💡 Key Insight

Highest demand from Netherlands, EIRE, Germany
Strong opportunities in European regions
Some countries show low penetration

⚠️ Business Implication

Clear regions for expansion

✓ Recommended Action

Expand operations in high-demand regions
Enter underperforming markets strategically

SUMMARY OF KEY INSIGHTS

Four questions. Four insights. One unified direction.

Q1 - Revenue

Strong seasonal revenue growth in Q4

Q2 - Customers

Top countries drive majority of revenue

Q3 - Trends

Small group of customers generate high value

Q4 - Churn

Expansion opportunities in high-demand regions

STRATEGIC RECOMMENDATIONS

Prioritized actions ranked by business impact:

HIGH

Focus marketing on top countries

Owner: CMO + Sales

 0–30 days

HIGH

Prepare inventory for peak seasons

Owner: CMO

 30–60 days

MEDIUM

Retain high-value customers with loyalty programs

Owner: Marketing

 60–90 days

MEDIUM

Expand into high-demand international markets

Owner: Data & CRM Team

 60–90 days

Data Doesn't Just Describe the Past. It Shapes the Decisions That Define Tomorrow.

This analysis provides a strong foundation for strategic planning and future growth.

Ready to support future forecasting- THANK YOU
